

R&S®FPC1000

versus

Keysight N9320B

The R&S®FPC1000 is comparable to the Keysight N9320B series in major RF parameters but with a better UI at a much lower price tag

The R&S®FPC1000 offers similar RF performance: DANL, RBW range are better than on the Keysight N9320B. The key USPs of the R&S®FPC1000 are a much better display, Wi-Fi remote control capability and a unique, flexible frequency upgrade concept resulting in a much better user experience.

Its light weight and low power consumption make the R&S®FPC1000 ideal for rack integration, too.

R&S®FPC1000, 10.1" display with 1366 x 768 pixel resolution.

Keysight N9320B, 6.5" display with 640 x 480 pixel resolution.
