

R&S® NGE100

versus

Rigol DP812A

Fitting your daily needs

- All channels are galvanically separated and earth-free
- All channels are electrically equivalent with the same voltage, current and power
- Parallel and serial operation through V/I tracking
- Protection functions to safeguard instrument and DUT
- Tracking and link functions
- Remote control via USB interface and optional LAN or wireless LAN, unique in this class

Your benefit	Features
Straightforward operation	All basic functions can be operated via direct keys on the front panel. The spin wheel plays the central role to adjust voltage and current.
The separate output channels can work like individual power supplies	All channels are electrically equivalent, galvanically separated, earth-free and provide the same voltage, current and power.
Small, compact and quiet	Combination of primary transformer, secondary switching regulator and additional linear control reduces weight and size, yet maintains robustness and low ripple.

Wireless LAN option

Wireless LAN option allows easy access to the unit.

Built for production

Digital I/O option makes production integration a breeze.

Parallel and serial operation through V/I tracking

Running in parallel, higher currents can be achieved; serial connected channels yield higher voltages.

With electrically equivalent channels and galvanically isolated outputs, the single channels of the R&S®NGE100 work like individual power supplies.

The Rohde & Schwarz advantage

Combination of primary transformer, secondary switching regulator and additional linear control reduces weight and size, yet maintains robustness and low ripple.
